## Senate Told University Faces Major Problems

In his report to the 29 April meeting of Senate, President Horowitz warned that the University faces major problems in the months ahead.

With a projected shortfall of \$1.9 million, Dr. Horowitz told Senate that "we have had to cut \$4.5 million from our budget and this is very, very painful." In saying that the provincial government's 1983-84 grant will not cover all the University's expenses, the President outlined some of the measures the University plans in its efforts to cut costs. "We may have to lose thirty-five permanent academic positions and a corresponding number in the non-academic, sessional, and graduate assistantship sectors." Dr. Horowitz added that the administration will suffer twice as severely as other areas.

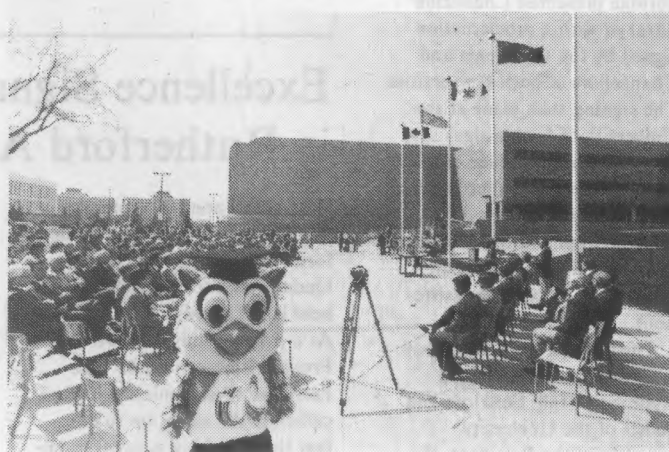

Another direction in which the University may have to move concerns the imposition of quotas in the Faculties of Arts and Education. The University has experienced a substantial increase in enrolment this year and the President emphasized that "we cannot continue to allow such increases with limited funding."

On another front, the names of recipients of awards from the Emil Skarin Fund were announced to Senate. The University's Ring House Gallery has been allotted \$4,000 for "Themes and Instances—A Photographic Exhibit," tentatively scheduled to run from 22 October to 27 November

next; English Professor Gordon Moyles received \$2,000 to assist in the publishing of a scholarly work, "Paradise Lost" — A Study in Editorial Procedure; and the Garneau Community League was awarded \$865 to create signs proclaiming the old street names in the Garneau area.

Chancellor Savaryn announced that eight people will receive honorary degrees during Spring Convocation, 31 May to 2 June. They are: Eric and Barbara Cormack, Mattie McCullough, George Shevelov, Jean Forest, Rosalyn Yalow, Harry Gunning, and George Tuttle. The Chancellor also expressed great pleasure in announcing that His Royal Highness The Prince of Wales has accepted an invitation to receive an honorary Doctor of Laws degree from the University. The degree will be conferred at a special convocation to be held in the Northern Alberta Jubilee Auditorium on 30 June.

Senate also elected four public members and re-elected four others. The new members are Fr. William Martin, Director of the Edmonton Catholic Social Services; Marilyn Lee, a journalist with CBC Edmonton; Cameron McDonald, a Vermilion teacher; and Henry Wojcicki, an Edmonton psychiatrist. Those re-elected are Barbara Bromley of Yellowknife and Reg Basken, Rev. Tom Leadbeater, and Mr. Justice Tevie Miller, each of Edmonton. The Senators' terms of

*The band played, the flags flew, Wugie did the boogie, and President Horowitz received his own personal yellowphunt. And, to complete the festive Universiade Pavilion Handover ceremony, held last Friday in "Yellow Square," a multiple ribbon-cutting ceremony took place, with representatives of the federal, provincial, and municipal governments, FISU, the Universiade Corporation, and The University of Alberta at the scissors. The pavilion, described by Julian Koziak as a marvellous legacy, will be used extensively throughout the World University Games, and will be made available to the community at large as a multi-purpose facility after Universiade '83.*

office will extend for three years from 1 July next.

Mr. Justice Miller, Chairman of the *Ad hoc* Committee for Community Service Awards, reported to Senate that the Committee felt such awards would be appropriate in honoring members of the academic and non-academic staff for work done above and beyond their professional duties. Several Senate members, including Alf Peterson, expressed some concern over the definition "community service." Professor Peterson felt that a clear definition should be arrived at to set guidelines for the awards. Some members also queried the necessity for the awards inasmuch as the Univer-

sity has a threefold role of teaching, research, and community service. Should the Senate give an award for something that is part and parcel of one's professional duties given that threefold mandate? Professor Peterson stated that perhaps the award should be given to the person who has done the most to bring the University closer to the community and who has best publicized what the University does. Senate approved the Committee's findings in principle but referred the question to the Committee for further study.

On the matter of "National Universities Week," to be held from 2 to 8 October, Mary Lobay, Chairman of an *ad hoc*

committee established to review the Senate's participation in the event, recommended that Senators could lead tours of campus by school children and community groups, speak about Senate and the University to community groups, and visit schools in their local communities.

Before Senate adjourned for the official re-opening of Assiniboia Hall, Chancellor Russell of the University of Lethbridge presented Chancellor Savaryn with a proclamation signed by the Presidents and Chancellors of both Universities. The signing took place at the University of Lethbridge-sponsored performance of the Royal Winnipeg Ballet honoring our 75th Anniversary. The proclamation had to do with continued goodwill and cooperation between our two institutions.

Then, in the brief ceremony marking the re-opening of Assiniboia Hall, Senators and guests of the University heard from the President, the Chancellor, and Vice-President (Facilities and Services) Phillips. A plaque was unveiled, and tours of the building were conducted.

page two, *Folio*, 12 May 1983

After lunch in the Heritage Lounge of Athabasca Hall, Senate reconvened to hear from Peter Freeman, University Librarian, who outlined the role of the library, highlighted its facilities and resources, and set before Senators an overview of the problems facing the system in the future.

Student financing was next on the agenda. Wes Sawatzky, out-going Vice-President (Internal) of the Students' Union,

expressed concern over the plight of students with respect to financial aid. He outlined for Senators some of the financial problems facing students at this University and fielded questions concerning ways in which Senate could play a role in tackling such questions. After some discussion, it was decided to receive the report for information, and use it as a guideline in discussions soon to take place between the prov-

ince's four university senates and the provincial government. It was also suggested that student financing be considered as the subject of a Senate Task Force.

Senators then heard from Rev. Tom Leadbeater who presented his report on the University's Academic Development Committee. Syeda Hameed, Alberta Advanced Education, also presented a report. □

## Excellence Signalled in Rutherford Awards

The second annual ceremony for the conferring of the Rutherford Award for Excellence in Undergraduate Teaching was held last Thursday, 5 May. At a packed University House, President Horowitz and Vice-President (Academic) Baldwin called public attention to the fact that teaching is equal in importance to research in a University and that the four recipients of the award this year, while honored individually, represent an excellence in teaching that is one of the hallmarks of our University.

The President, in his introductory remarks, also singled out the families of *Fred Vermeulen*, *Pierre Monod*, *Chris Janssen*, and *Steve Willard* for their support and encouragement. He pointed out that the University may pay one salary but in reality is the beneficiary of more than one person's commitment.

---

## Summer Publishing Schedule

During June, July and August, *Folio* will be published bi-weekly. The bulletin will appear on 9 and 23 June, 7 and 21 July, and 4 and 18 August.

Current deadlines will remain in effect.

*Folio* will return to a weekly publishing schedule in September. □

The award, named in honor of A.C. Rutherford, first Premier of Alberta, was struck last year to "publicize (teaching) excellence to the University community and the wider community, to encourage the pursuit of such excellence and to promote informed discussions of teaching and its improvements at The University of Alberta."

The first recipients were Roger Beck (Business), John Kuspira (Genetics), and Charles Stelck (Geology).

Pierre Monod, Romance Languages, has devoted his career to the field of language teaching. He has taught language at the 200 and 300 levels, translation and civilization at the 400 level, as well as children's literature and a 400 level language course in the off-campus Jonquière program. Two courses, French 201 and 301, were created and designed by Dr. Monod. He also served as their coordinator (both are multi-section) for many years.

In language teaching, research is directed not so much at what to teach as how to teach it. A number of Dr. Monod's publications arise directly from his experiences in the classroom and most have returned to the classroom in the form of approved methodology and/or textbooks.

Dr. Monod has worked to raise the standards of teaching French through continuous

close supervision of graduate student and sessional instructors in the multi-sectioned courses he has coordinated for many years. He has also conducted workshops for prospective and current teachers of French and was a member and chairman of the GFC Committee to Improve Teaching and Learning (1976-78).

As a resource person, Dr. Monod is often in demand to teach teachers, address meetings of societies in the discipline, and prepare reports for Alberta Advanced Education.

He holds a LicScEcon from Geneva, a MA from Alberta, and a PhD from Strasbourg.

Stephen Willard has taught virtually every course the Department of Mathematics offers and has written the texts *Calculus and Its Applications* and *General Topology*.

"I think The University of Alberta is extremely fortunate to have a teacher of Professor Willard's calibre," says one of his former students, now a research analyst with IBM.

Dr. Willard, a graduate of the University of Rochester (BA 1962; PhD 1965), has been on campus since 1970. He was the 1982 winner of the Faculty of Science's award for teaching excellence.

Dr. Willard has served on numerous committees responsible for recommendations on curricula and quality of teaching at the departmental,

University, and provincial levels. In 1970, he prepared and taped two television programs: "The Nature of Mathematics" and "Computers." The videotapes were retained by the Department of Mathematics after their initial appearance on television and are still shown to prospective students of mathematics.

Christian Janssen is a graduate of the University of Goteborg, Sweden, and Cornell University (PhD 1968). He came to The University of Alberta in 1969 and since that time has earned a reputation as an outstanding teacher and administrator.

Dr. Janssen's field is quantitative analysis with special interests in decision models, finance, banking, and real estate. His teaching here has been split between the MBA and BComm programs. In addition to his extensive teaching responsibilities, Dr. Janssen has been an active administrator in the Faculty. Associate Dean from 1970 to 1974, he was instrumental in a major revision of the BComm program.

Honors are not new to Dr. Janssen. In 1981, he received the first J.D. Muir Award for Distinguished Teaching, an

award created by the Faculty of Business in memory of Douglas Muir, long-time Faculty member. That same year, he was named Professor-of-the-Year by his Faculty's undergraduate student society.

Fred Vermeulen has long been recognized as an outstanding teacher in the Department of Electrical Engineering. Since his department introduced compulsory student course evaluations in 1975, Dr. Vermeulen has consistently received the highest rating of any member of the department (except in 1980 when he was on study leave).

Dr. Vermeulen is a graduate of this University (BSc, PhD) and the University of British Columbia (MAsc). Since he began teaching here in 1967, Dr. Vermeulen has taught eleven different undergraduate and five graduate courses ranging from advanced electromagnetic theory to first year engineering statistics. In 1982 Dr. Vermeulen and his colleague, F.S. Chute, won the "Best Paper Award" from the Education Society of the Institute of Electrical and Electronics Engineers, the leading electrical engineering institute in the world. □

## Printmaking Students Make Art News

In a recent juried exhibition of art works at the UCLA Frederick Wight Art Gallery in Los Angeles, printmaking students from our University's Department of Art and Design distinguished themselves with a number of accepted entries.

The exhibition, "The Third National Student Printmaking Exhibition," is open to all currently enrolled undergraduate and graduate students in North America and includes submissions in all printmaking media. Out of some 500 entries submitted to the jury, sixty-two works were selected. Six of the works retained for exhibition were prints by Art and

Design students. Eleven 'Awards of Merit' were given for outstanding, innovative works in the field of printmaking, two of which were awarded to University of Alberta students.

This exhibition is the major American student printmaking competition and provides a comprehensive overview of high quality prints being produced at universities and art colleges around the continent. The participating University of Alberta students, comprising about one-tenth of the exhibitors, are Marna Noble (award), Sidi Schaffer (award), Jane Ash, Dianne Addy, and Lorraine New (two works). □

## University's Role in Development of Modern Sport to be Studied

Universiade '83 has a strong academic component, the standard bearer being the FISU/CESU/HISPA Conference to be held 2 to 4 July at the Edmonton Convention Centre. About 500 delegates from more than fifty countries will examine the University's Role in the Development of Modern Sport: Past, Present and Future. This theme will be supplemented by four sub-themes: the Xth HISPA Congress of the International Association for the History of Physical Education and Sport; University Sport in Emerging Nations; Issues in University Sport; and Sport Medicine in University Sport.

(FISU is the Fédération Internationale du Sport Universitaire; CESU is the Commission Pour l'Etude du Sport Universitaire; HISPA is the Association Internationale d'Histoire de l'Education Physique et du Sport.)

Gerry Glassford, Dean of the Faculty of Physical Education and Recreation, and Peter Lindsay, Chairman of the Department of Physical Education, are the conference coordinators. They and a number of other planners have slotted in five practical sessions on the Emerging Nations theme. Volleyball, basketball, gymnastics, track and field, and diving clinics will be held at various sites in Edmonton. Local physical education teachers will be encouraged to attend and learn from top flight international coaches.

The latest equipment will be brought into play to translate all keynote addresses into French, English, German, Spanish, and Russian. And the *Sports Terminology Dictionary* developed in cooperation with the University will be thumbed through with regularity. The five language volume contains sections on each of the ten official sport disci-

plines of Universiade '83 and everyday phrases needed by athletes, officials, and visitors.

The conference will open at 9 a.m. on 2 July. Among the invited participants are Prime Minister Trudeau, Premier Lougheed, Mayor Purves, President Horowitz, Primo Nebiolo, President of FISU, and Gerry Redmond, President of HISPA.

The first keynote speaker will be Peter McIntosh, Senior Inspector of Physical Education to the London County Council of Schools. In a previous capacity, that of Deputy Director of Physical Education at the University of Birmingham, Professor McIntosh was instrumental in establishing the first degree program of physical education in a British university.

William Baker, the HISPA keynote speaker, is on the faculty of the University of Maine at Orono. He has more than thirty scholarly articles to his credit and has published *Sports in the Western World* (1982) and *America Perceived: A View from Abroad in the 19th Century* (1974). A forthcoming work centres on track and field immortal Jesse Owens.

The Issues in University Sport sub-theme will be addressed by Art Quinney of our University's Department of Physical Education. Dr. Quinney is an exercise physiologist with an interest in exercise testing and exercise prescription. He acts as consultant to professional and Canadian national sport teams and serves on several national and provincial sport and fitness related boards. Dr. Quinney is President-Elect of the Canadian Association of Sport Sciences.

Don Anthony, the Emerging Nations keynote speaker, has been researching, writing, and teaching in the sports realm since 1948. He has been involved

in sports planning in more than twenty-five emerging nations and has been a consultant to the International Olympic Committee. Mr. Anthony is Principal Lecturer in Physical Education at Avery Hill College, London.

The closing speaker on 2 July is Abby Hoffman, Director of Sport Canada. She represented Canada internationally in track and field from 1962 to 1976, competing in four Olympic Games, four Pan-American Games, three World Student Games, and two Commonwealth Games. Miss Hoffman holds a master's degree in political science from the University of Toronto.

Starting at 9 a.m. the next day, individual papers will be presented in six separate rooms. (The total number of speakers for the conference is 127.)

The same presentation format will be followed on 4 July

with one exception—there will be no paper presentations for the Emerging Nations theme. The five clinics will take place this day; delegates may choose a sport and attend that particular clinic.

At 4 p.m., all delegates will gather for the closing panel discussion and conference summary. The panelists will include all keynote presenters as well as members of the Organizing Committee Executive,

and members of the CESU Executive.

Other University of Alberta personnel participating in the conference as theme convenors are Tim Burton (Recreation Administration), Issues in University Sport; John Kramer and David Magee (Physical Therapy), Sport Medicine in University Sport; and Jacob Agbogun, University Sport in Emerging Nations. Mr. Agbogun, a former Director of

Sport in Nigeria, is a PhD student at our University.

Starting in 1960, FISU/CESU/HISPA conferences have been held every two years. The host countries have been Switzerland, Austria, England, Germany, Israel, Sweden, Finland, Bulgaria, Mexico, and Romania. In 1977 the conferences became aligned with the World University Games. □

## Enrolment Changes Since 1978-79

A great deal of concern and interest has been generated on our campus by the substantial increases in enrolment experienced in the last two Winter Sessions. In order to place these increases in perspective, three tables have been prepared showing student data for 1978-79 through 1982-83. *Table 1* shows undergraduate enrolments in each Faculty, along with per-

centage changes from (a) 1978-79 to 1982-83 and (b) 1980-81 to 1982-83. Graduate enrolments by Faculty of discipline are shown in *Table 2* with relevant percentage changes. *Table 3* lists Weekly Student Hours (WSH = total number of students multiplied by number of hours of scheduled classes per week for each course) and relevant percentage changes for each Faculty. The

enrolments shown are the official figures for 1 December each year. Substantial changes from these figures may occur during the academic year and between terms. For example, in Term 2, Arts varied from 3,817 (2 February 1983) to 3,647 (30 March 1983) as compared with the 1 December 1982 enrolment figure of 3,490.

Some noteworthy trends

## Speaker of Legislature Closes MPM Series

Students in the new Master of Public Management (MPM) program in the Faculty of Business recently attended the final presentation for this academic year of the MPM Dialogue Series. This series of informal sessions was initiated in Fall 1982 to give graduate students and other interested people the opportunity to interact with individuals involved in public management. At the concluding session, the Hon. Gerard Amerongen, Speaker of the Alberta Legislature, presented a seminar on the topic "Mr. Speaker's Role in Parliamentary Democracy."

F.C. Engelmann, Chairman, Department of Political Science; Dean Roger Smith, Faculty of Business; and Allan Warrack, Director of the MPM Program, also attended the seminar. □

\* indicates highest enrolment ever at The University of Alberta.

occurred, especially for the three largest Faculties (Arts, Education and Science). Undergraduate enrolments in Arts were stable for 1978-79 through 1980-81, but then increased by about 200 and 400 in succeeding years. WSH for Arts did not substantially increase until 1982-83. However, considerable variations occurred among the trends in WSH for individual departments within Arts. Science is now the largest Faculty in terms of enrolled students, having gained approximately 500 and 300 in the last two years; the WSH pattern in Science is similar to that in Arts. Education now has the lowest enrolment of the three large Faculties, although the rapid decline in Education student numbers from 1978-79 to 1980-81 has been reversed. Other recent substantial enrolment increases have occurred in Business, Nursing, and Faculté Saint-Jean. Engineering and Rehabilitation Medicine have recorded modest increases in enrolment.

Graduate enrolments in all Faculties except Arts (and Interdisciplinary Studies which is being phased out) showed increases in 1982-83 over 1978-79. Even in Arts, where the graduate enrolment had declined steadily from 1978-79 to 1981-82, a substantial increase occurred in 1982-83. The total graduate enrolment of 2,302 in 1982-83 represented an increase of 215 over 1981-82.

The following Faculties recorded their highest enrolments ever on 1 December 1982—Arts, Engineering, Medicine, Nursing, Rehabilitation Medicine, Faculté Saint-Jean and Science. In addition, the undergraduate and graduate totals were the highest ever attained at The University of Alberta.

Current indications are that The University of Alberta can expect even more undergraduate and graduate students in 1983-84, with the full-time student total possibly exceeding 23,000 in September. Projection of actual numbers

is a difficult exercise because attendance of new students and retention of existing students are affected by such factors as

the state of the economy, availability of student assistance, summer employment, perceptions of the University, effect of

the proposed comprehensive examinations, and the University's position on writing competence.□

Pictured are the routes for the 20 May "President's Walk." Do keep in mind that "the walk starts where you are." Just step out of your office and join the perambulators. Route A will take about forty minutes to cover; route B about twenty minutes. The walk will start at 12:10 p.m. in the vicinity of University Hall. Break a leg, everybody!

## Six Alumni Inducted Into Sports Wall of Fame

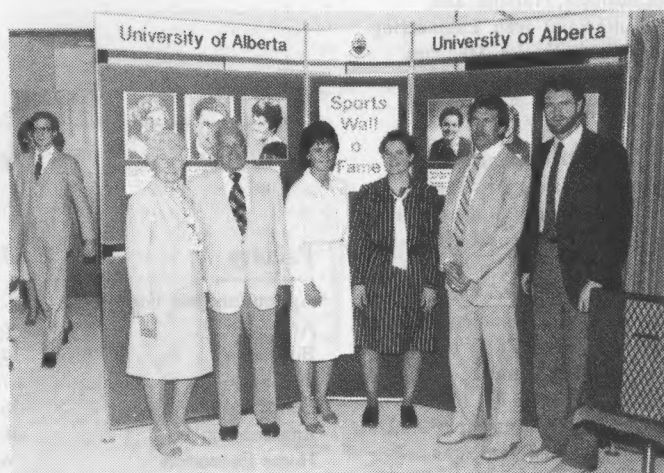

On 6 May, six outstanding University of Alberta athletes were honored at a special inaugural ceremony inducting them into the University of Alberta Sports Wall of Fame, a 75th Anniversary project sponsored by the Faculty of Physical Education and Recreation. The induction took place at a luncheon in University House.

The first inductee, Ethel Cuts, née Barnett, graduated from this University in 1930. An athlete who excelled in track and field and basketball from 1927 to 1929, she won the Bakewell Trophy in her first year of inter-collegiate competition in track and field. Edmonton Eskimo receiver Brian Fryer was also honored. He arrived at the University in 1972 and was particularly outstanding in football and track and field. In 1974, Mr. Fryer was selected by his teammates as the most valuable backfielder and was also named as an all-Canadian.

Randy Gregg, former member of the Canadian Olympic Hockey Team and currently a defenceman with the

Edmonton Oilers, was inducted into the Wall of Fame for his stellar work on behalf of the Golden Bears hockey team which, for two years in a row, won the national hockey title. He was selected captain of the team in 1979 and was honored as the most outstanding male athlete of that year. Another female athlete chosen for the Wall of Fame was Kathy Moore. An outstanding basketball player, Ms. Moore was elected one of the captains of the Pandas team three times. In addition, she was a valued member of the University field hockey team and was selected its captain twice. Her athletic and academic abilities were rewarded in 1977 when she was awarded the Bakewell Trophy as the outstanding female athlete.

A Ross Sheppard High School teacher is another athlete being recognized by the University. During her four years on campus, Beverly Richard participated in basketball, tennis, and badminton as a member of the Pandas teams. She starred in tennis and badminton

Oh, what a feeling for Sports Wall of Fame inductees (left to right) Ethel Cuts Barnett, Bill Shandro, Beverly Richard, Katharine Moore, Brian Fryer, and Randy Gregg.

and brought particular recognition to the University during the 1967 Canada Student Games when she and her teammate won the doubles competition in badminton. Bill Shandro, an Edmonton surgeon, is the sixth inductee. Dr. Shandro won the 1929 western inter-collegiate scoring title in basketball and not only played on the basketball and rugby teams but also coached men's and women's varsity basketball.

Nominations of athletes for

consideration were accepted from any individual or group wishing to make them. However, to ensure that nobody was overlooked, a number of names were automatically put forward. These included all winners of the Wilson and Bakewell trophies, awarded annually to the University's top male and female athletes, and all those judged the outstanding athlete in each sport, in each year.

It was the responsibility of a committee, made up of various

people who have been close to University athletics throughout the years, to choose the inductees.

A major induction ceremony will be held this fall to add more names to the University's Sports Wall of Fame. □
